I'm Mackenzie, I am a front-end developer. Using HTML, CSS, and JavaScript, I build responsive, accessible, and modern applications. With several years experience in client facing cross functional roles I bring a wealth of experience in effective communication and team based collaboration.

FRONT-END DEVELOPMENT

- HTML
- CSS / SCSS
- JavaScript
- jQuery
- React (Hooks & Classes)
- Firebase
- RESTful APIs
- NPM
- Version control and collaboration with Git & Github
- Accessibility / WCAG 2.0
- Responsiveness

SOFT SKILLS

- Effective communicator
- Problem solver
- Approachable and open minded
- Team oriented
- Empathetic

EDUCATION

Web Development Immersive Certificate

Juno College of Technology, Toronto, ON

January 2022 - April 2022

Accelerated Intro to Web Development

Accelerated Intro to JavaScript

Bachelor of Sport Management (Honours)

Brock University, St. Catharines, ON

September 2012 - June 2016

PROJECTS

Podcast Prioritizer

HTML | SCSS | React + Router | Firebase | Group Programming

[Live Link](#) | [GitHub](#)

- A podcast suggestion app built with React which suggests a list of podcasts based on the type and duration of your commute as well as the chosen genre.
- Using Firebase users can like a specific podcast, they are then stored and placed within a community likes feature where users can view.
- Combining the use of React Router and session storage we are able to ensure each podcast has its own page and user inputs are saved on refresh.

Jeopardy

HTML | CSS | React

[Live Link](#) | [GitHub](#)

- A mock Jeopardy game built in React using the jService.io API.
- Users are prompted with 5 questions and an answer input, each question guessed correctly increases their score.
- Solo project with continuous updates adhering to WCAG standards, requiring timeline and project scope estimates.

Flix

HTML | CSS/SCSS | JavaScript | Pair Programming

[Live Link](#) | [GitHub](#)

- A paired programming project using a RESTful API.
- Users can search for movies, sort by genre, or explore new flicks with our discover feature. Upcoming and Top Rated movies are also available.
- Implemented error handling in search functionality and API calls.

WORK EXPERIENCE

Client Service Representative

Accenture | 2019 - 2021

- Provided full service technical & ad campaign strategy support for Facebook Agency Advertisers.
- Mentored cohorts of new hires, typically a class size of 5-10 individuals by performing one on one shadowing sessions leading to a better understanding of Facebook advertising tools upon on-boarding.
- Consistently met organizational KPIs and external agency satisfaction metrics(>80% agency satisfaction with service provided).
